Early Harvest Program

Provision Of Seed Funding To Promote Rapid Market Expansion And Business Growth For Newly Commercialized Digital Healthcare Services

- ✓ Support for demonstration at the commercialization stage, not at the product and service development stage
- ✓ Expanding the user experience of digital healthcare services for demand-side companies
- ✓ Sharing of service processes by excellent digital healthcare companies
- ✓ Securing reference competitiveness for early-stage digital healthcare companies to enter the market

AI-based cognitive rehabilitation service development company

“We have created an opportunity to widely publicize new services to the public while reducing the burden of promotional costs.”

Developer of a Patient Management System and Health Management Service for Primary Care Institutions:

“We have opened the way to expand our business scope based on evidence directly obtained through demonstration at the demand site.”

Developer of a Cancer Patient Management and Health Fitness Platform:

“Unlike traditional R&D, the promotional marketing support provided direct help to our business.”

Developer of a Global Concierge and Telemedicine Service Based on Medical Data:

With expert consulting support, we have strengthened our competitiveness through profitability analysis and future outlook.”

Digital Healthcare Demand-Supply Matching Day

Providing A Forum For Business Exchange Between Digital Healthcare Suppliers And Domestic And International Demand Companies.
